CITY MULTI S-Series

The 'all-in-one' solution for large residences and small offices with multiple rooms.

Optional

BUILDING MANAGEMENT SYSTEM

The S-Series is the perfect solution for large homes, small offices and light commercial applications that require heating and cooling for large areas or multiple rooms. This system allows up to eight different indoor units, of varying styles and capacities, to be connected to a single outdoor unit.

Furthermore, if the total piping length is less than 50m, there is no need to add extra refrigerant. Also, this dual piping system allows automatic switching between cooling and heating while maintaining a constant comfortable indoor temperature.
