

CQ Air Solutions

The Growing Problem

“Indoor Air Pollution is America’s most serious Environmental health problem affecting humans.”

(US Environmental Protection Agency)

“It’s hard to come up with another problem that effects more people than Indoor Air Pollution.” (Yale School of Medicine)

Most people spend 90% of their time indoors.

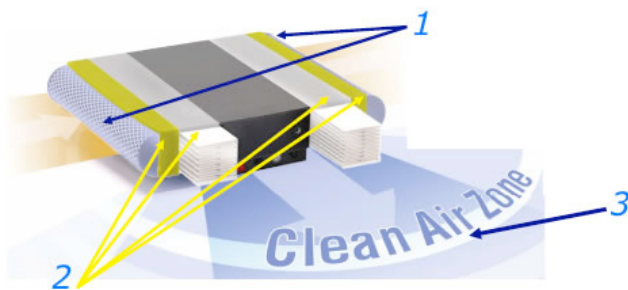

A Hybrid Solution to a Complex Problem

The Clean Air Option Air Purification System offers these combined advantages over conventional air purification systems.

- State-of-the-Art Gas Phase Removal
- High Efficiency Particulate Removal
- Very Low Pressure Drop
- Extremely Quiet
- Energy Efficient
- Professional Quality

The Process

1. Bring the polluted air to the purifier.
2. Capture or eliminate the particles and the gases.
3. Return clean air to the room.
4. Operate purifier continuously.
5. Maintain System efficiency.

**“If you don’t have an air purifier,
YOU are the air purifier!”**

The CAO Family of Air Purifiers

The CAO Corner Model contains the same high efficiency, low noise capabilities as all of the CAO Air Purifiers, but it was designed specifically for those applications where wall space is limited.

The CAO Corner Model is 15.4" Wide X 14.6" Deep X 29" High.

The CAO Personal Model is uniquely designed to provide an individual with a "Clean Air Zone" regardless of the air quality in the surrounding environment. It is extremely quiet and ideally suited for use under a computer monitor; a night table; or in any personal space where very clean air is desired.

The CAO Personal Model is 13.8" Wide X 9.85" Deep X 3.2" High.

The CAO Wall Model was designed to provide very Clean Air to larger spaces such as Offices, Conference Rooms, Bedrooms, etc. This dual fan, dual filter model provides quiet efficiency that is unmatched in the industry.

The CAO Wall Model is 22.3" Wide X 8.7" Deep X 24" High.
