

Press Release

GREEN & CLEAN ENERGY PARTNERS WITH RESCoLEASE FOR CLIENT CAPITAL FINANCING AND SUSTAINABLE PRODUCTS' LEASING OPTIONS

MARCH 1, 2009 – GUELPH, ONTARIO – Green & Clean Energy Co., (Green & Clean) designers, manufacturers, consultants and distributors of leading B2B and B2C environmental products and services, announced that they have partnered with RESCoLease Corp. Green & Clean will offer their clients access to RESCoLease's Vendor Finance Program (VFP) for capital, custom and operating leases, lines of credit and financing and funding options in Canadian or U.S. dollars. The program will support many types of green energy initiatives, including purchase of environmental products, their installation and general project costs.

Rocky Montesano, Green & Clean's President, said, "Partnering with RESCoLease gives our clients the ability to ramp up their new environmental programs and projects, despite the current recessionary climate. Our clients will now be able to lease instead of incurring capital expenses for their projects. We can help them go green in a big way, while they save money, and achieve a return on their investment more quickly."

Green & Clean's programs with RESCoLease will be made available to their North American clients and will ensure that flexible payment terms and payment plans can be arranged. RESCoLease's vendor financing program was designed to support manufacturers, distributors and retailers of renewable energy systems. This initiative will allow Green & Clean's client companies to expand their businesses and achieve short- and long-term business benefits as a result of this unique funding opportunity.
